## 1. Governance Statement

We herewith confirm the results of the study to be an Ipsos Pty Ltd body of work. Ipsos was commissioned by British American Tobacco South Africa (Pty) Ltd ("BAT") to carry out research into the cheapest purchase prices in the tobacco cigarette market.

The study is free of interference from the commissioning company. BAT had no role either of oversight or influence in the selection of the sample stores, researchers employed for the study, any part of the quality control process, nor in the analysis of the data. All data, and associated research intellectual property remain the sole property of Ipsos Pty Ltd.

For purposes of preservation of purchased items for any legal challenges or requirements, all samples and proof of purchase invoices have been placed in sealed evidence bags for future use. The samples have been stored in a secure location.

In order to address bias in the study, all results tabled in the executive summary and mini report cover all manufacturers of products found in the market for the study. No specific brand, manufacturer, retailer, or wholesaler was discriminated against, and all were within the scope of the study by virtue of its design. The only limitation applied for the study was that the retailer must be a tobacco retailer in either a form of a branded retail chain or forecourt, or an independent retailer not linked to any organized branded retail chain.

## 2. Methodology

In order to answer the research question British American Tobacco had posed, having considered other potential approaches to answering the research question, Ipsos Pty Ltd selected the Mystery Shopper methodology as the most appropriate approach.

The mystery shopper approach is a widely used research approach, which has been applied in many scenarios requiring mimicking shopper experience across the globe. The approach is generally used to understand brand metrics such as pricing, promotional items, and consumer experience of product in store or the store experience. Various sectors use the approach for a myriad of market research questions related to consumer experience.

Mystery shopper as a research approach can be utilized to answer the following instances and business questions:

Applying the method, the responsibility of the researcher is as follows:

## Mystery shopping approach to price checking studies:

- Shopper poses as an actual consumer at retail location
- Shopper enquires at retailer for brand/s availability and price options
- Shopper requests cheapest pack price

## The process of the research explained.

For the study it was important that the process followed be governed Ipsos' strict market research guidelines, as defined within the Ipsos Pty Ltd approach to market research, and subject to quality assurance. The following research process was applied:

- Sample stores, representing the universe for both modern and informal trade across Gauteng, Free State and Western Cape were identified;
- Ipsos field interviewers conducted a mystery shop at the sampled stores and posed as a regular consumer and gathered the information for the research by:
- Casually enquiring about the cheapest selling cigarette brand available in the store, without specifying any brand preference
- Purchasing the cheapest cigarette brand available at the time of the visit;
- Only one pack/carton was purchased per store thus meaning that throughout store $=$ pack/carton
- Once the interviewer left the store, they recorded the price, region and name of the store on a CAPI device. The purchased cigarette product was then labelled and placed in a sealable bag and the bag was labelled with the following details: date, store details, region, product, price, interviewer name and signature;
- These products were then delivered to Ipsos head offices, matched back to the store visited, verified, and kept in a secured room as proof of purchase; and
- Throughout the fieldwork process, Ipsos had the following quality control checks in place:
- Local \& regional supervisors did control checks on prices paid and specific products purchased;
- The data collected on the platform was run through a scripted quality control check to highlight any omissions, anomalies or inconsistencies'
- The acceptable pricing parameters formed part of the script checks;
- Regions and areas were matched backed to the original sample selection to ensure that the sample spread will ensure representation of the total market; and
- $10 \%$ spot checks done on products purchased vs data collected.

## 3. IPSOS Fieldwork WAVE 2

Total Duration: 17-23 March 2021
Field days: 17-22 March 2021
Quality check and re-shop days: 23 March 2021
(WAVE 1- Total Duration: $11-16$ February 2021; Feld days: 11 -14 February 2021; Quality check and re-shop days: 15-16 February 2021)

## 4. Questions asked by IPSOS field worker

Researchers were briefed to ask the following question:
"I want to by the cheapest 20 pack available"; and
"I want to buy the cheapest carton available".
No price negotiations were allowed.

## 5. Research retail price point definitions

Excise rates March:
R18.79 for 20 sticks (1 pack), or R187.90 for 200 sticks (1 carton)
[Sec 37 of the Customs and Excise Act, No. 91 of 1964 - Schedule No 1, Part 2A, Tariff Item 104.30.07]

MCT = Minimum Collectable Tax (Excise rate $+15 \%$ VAT $^{*}$ )
R21.61 for 20 Sticks (1 pack) or R216.10 for 200 Sticks (1 carton)
*[Sec 7 of the Value-Added Tax Act, No. 89 of 1991]

## Research price points ranges

1. R20.00 and below for a pack of 20 sticks - R200.00 and below for a carton of 200 sticks Price point is used as reference price point for below MCT sales before excise rate change and used in this report to analyze the price trend after excise increased as to R18.79 as of end February 2021
2. R21.60 and below for a pack of 20 sticks - R216.09 and below for a carton of 200 sticks Price break down 20 sticks: R21.60 is below the MCT of R21.61
Price break down 200 sticks: R216.09 is below the MCT of R216.10
3. R22.00 and below for a pack of 20 sticks - R220.00 and below for a carton of 200 sticks Price break down 20 sticks: Excise R18.79; VAT R2.87; Total Net Margin** R0.34 Price break down 200 sticks: Excise R187.90; VAT R28.70; Total Net Margin** R3.40
4. R25.00 and below for a pack of 20 sticks - Rand 250.00 and below for a carton of 200 sticks

Price break down 20 sticks: Excise R18.79; VAT R3.26; Total Net Margin** R2.95
Price break down 200 sticks: Excise R187.90; VAT R32.60; Total Net Margin** R29.50
**Total Net Margin must cover Manufacturer margin and all costs related to production, leaf, material, supply chain, Retail and Wholesale margins.

## 6. Research Scope

Total defined retail universe comprises 50257 stores based off hot spot regions selected namely Free State, Gauteng and Western Cape. The sample of the total national universe used for the research (the "Representative Sample", identified in the tables below under the heading "in scope") was modeled based on the national retail universe.

Table: Statistical representative sample of study for the three provinces

|  | Universe | Sample |  |
| :---: | :---: | :---: | :---: |
| Defined National | 47,849 | 668 | $3.5 \%$ |
| Free State/Northern Cape | 6,625 | 150 | $7.3 \%$ |
| Gauteng | 31,325 | 320 | $5.0 \%$ |
| Western Cape | 9,899 | 198 | $6.3 \%$ |
| H SHOP / SPAZA | 24,127 | 410 | $4.4 \%$ |
| In Sup/Corner Cafe | 5,415 | 309 | $5.0 \%$ |
| Table Top/Hawker | 16,416 | 188 | $6.5 \%$ |
| Wholesale | 4,299 | 93 | $9.3 \%$ |

However, in order to get a better understanding of the selected regions for the study, a boost was applied to the sample, to get a more granular view of the provinces. The reason for the selection of the three hot spot provinces, was to follow up on the Price Research from February 2021 and to understand the prevalence of illicit activity within the province, given the provinces were significantly more impacted by availability of below MCT pricing averaging $69.3 \%$ between them vs an average of $41 \%$ nationally. This significant disparity in availability of low pricing below or at R20.00 is of particular interest for understanding low pricing trends.

Thus, the review of the three most affected provinces in deep low pricing trends, provides a good proxy to understand the market behavior pre and post the excise rate change initiated by the National Treasury excise rate proposals. The basic understanding being that the most affected provinces would see a price shift driven by tax increases if the manufacturers of the product were compliant with the tax laws. In other words, the cheapest prices in the market on average should be at a higher price point than the previous study WAVE.

Table: Study Sample

| Channel | Free State | Gauteng | Western Cape | Channel Total |
| :---: | :---: | :---: | :---: | :---: |
| Modern Trade Grocery | 74 | 220 | 159 | 453 |
| Modern Trade Forecourts | 65 | 143 | 151 | 359 |
| Non Organized Informal | 777 | 908 | 780 | 2465 |
| Wholesale | 83 | 242 | 108 | 433 |
| Sample Total | 999 | 1513 | 1198 | 3710 |

Table: Non Organized Sample Sub Channels

| Non Organized Informal | Free State | Gauteng | Western Cape | Sub - Channel Total |
| :---: | :---: | :---: | :---: | :---: |
| Corner Café / Convienance | 52 | 125 | 98 | 275 |
| Spaza | 447 | 446 | 377 | 1270 |
| Table Top / Hawkers | 278 | 337 | 305 | 920 |
| Sample Total | 777 | 908 | $\mathbf{7 8 0}$ | $\mathbf{2 4 6 5}$ |

## Sub-channel definitions:

- Modern Trade Grocery: branded organized trade (Grocery). Referred to as Modern Trade in study
- Modern Trade Forecourts: branded forecourts (Petrol Retail Stores). Referred to as Forecourts in study
- Non organized informal: corner café/ convenience; spaza; tabletops / hawkers
- Wholesale - wholesale; semi wholesale / informal general dealer; cash and carry

## Sample process:

- A sample was designed to represent the South African cigarette universe at a provincial level as well as at major channel level.

## Sampling approach:

- Universe information available based on an earlier sample census conducted by Ipsos was used to establish a representative sample.
- Standard errors at all reporting levels were below $8 \%$.

Both Non Organized Informal and modern trade stores were covered to ensure a national view of low prices on cigarettes.
IPSOS Retail \& Wholesale Price Research - Hot Spot April $2021 \quad$ Page |8 DISCLAIMER: "Brand manufacturer identification was determined by on pack descriptor and where required through online GTIN barcode searching."

## 7. Analysis model

All price points were allocated to specific price groups based on the segmentation referred to in Section 5 above.

From the data gathered, the price points were arranged from lowest to highest price point recorded. This was done for packs and separately for cartons.

Furthermore, the number of times each price point presented itself in the study was noted.
Each brand was analyzed individually to record the proportion of occurrences at each price point as defined in Section 5.

These occurrences were aggregated at a provincial and channel level to provide a holistic view of the distribution of low(est) price point for different brands of cigarettes across SA.

Due to the shopper behavior in the Tabletop/Hawker channels (where most of the purchases are done per stick), higher than average pack prices were captured.

This was a result of the conversion ratios (by store owners) used to determine a pack price (sticks $\times 20$ ) on the per stick pricing strategy.

DISCLAIMER: "Brand manufacturer identification was determined by on pack descriptor and where required through online GTIN barcode searching."

## 8. Key Research Results - hot spot focus

### 8.1 Results of purchased products in total sample at defined price points:

In the key hotspot regions of Gauteng, Free State and Western Cape post the price increase of excise in February 2021 shows a trend of increased availability of R20.00 and below pricing, from $69 \%$ of the provinces' sample to $73 \%$ of sample.

In comparison Gauteng saw an increase in availability of the R20.00 and below prices, moving up by 8\% to $70 \%$ of outlets recording their cheapest product as R20.00 or lower prices. Free State still leads the country with the highest availability of R20.00 and below pricing at $81 \%$ of total provincial sample.

Lowest pack price recorded in the second study was R8.00 in Wholesale for a product called W33D manufactured by an unknown manufacturer in Gauteng. Remington Gold by Gold Leaf Tobacco Zimbabwe had the lowest price in the Free State sample retailing for R10.00 a pack, whilst Golden Flake by Afroberg Tobacco at R12.00 a pack was the cheapest in the Western Cape.

Table: Provincial incidence by price category

|  | Outlets in Scope |  | Cheapest price |  | $\begin{aligned} & \text { R20.00 and } \\ & \text { below } \end{aligned}$ |  | R21.60 and below |  | $\begin{aligned} & \text { R22.00 and } \\ & \text { below } \end{aligned}$ |  | $\begin{aligned} & \text { R25.00 and } \\ & \text { below } \end{aligned}$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Province | February 2021 | March $2021$ | Wave 1 | Wave 2 | Wave $1$ | Wave 2 | Wave <br> 1 | Wave $2$ | Wave 1 | Wave 2 | Wave <br> 1 | $\begin{gathered} \text { Wave } \\ 2 \end{gathered}$ |
| Free State | 449 | 996 | R9.00 | R10.00 | 76\% | 81\% | 77\% | 81\% | 78\% | 82\% | 87\% | 86\% |
| Gauteng | 709 | 1,499 | R9.00 | R8.00 | 62\% | 70\% | 64\% | 70\% | 66\% | 73\% | 79\% | 78\% |
| Western Cape | 483 | 1,078 | R10.00 | R12.00 | 73\% | 71\% | 73\% | 71\% | 73\% | 71\% | 78\% | 78\% |
| Grand Total | 1,641 | 3,573 | R9.33 | R10.00 | 69\% | 73\% | 70\% | 74\% | 71\% | 75\% | 81\% | 80\% |

### 8.2 Sales channel penetration

Highest incidence of R20.00 and below is observed in Wholesale (87\%) and Non Organized Informal ( $93 \%$ ) and this has increased since last reading. Modern Trade outlets who sold a pack of cigarettes below R20.00 and below has increased by $3 \%$ to $11 \%$ of the second study sample. This is higher than the national average of 5\% of Modern Trade outlets visited.

Table: Channel availability by price category

| Channels | Outlets in Scope |  | R20.00 and below |  | R21.60 and below |  | R22.00 and below |  | R25.00 and below |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | February 2021 | March <br> 2021 | Wave 1 | Wave 2 | Wave 1 | Wave 2 | Wave 1 | Wave 2 | Wave 1 | Wave 2 |
| FORECOURT | 166 | 359 | 1\% | 5\% | 1\% | 5\% | 1\% | 5\% | 4\% | 8\% |
| Non-Organized Informal | 1114 | 2466 | 88\% | 93\% | 89\% | 94\% | 90\% | 95\% | 96\% | 98\% |
| Modern Trade | 180 | 457 | 8\% | 11\% | 8\% | 11\% | 8\% | 11\% | 42\% | 28\% |
| Wholesaler | 181 | 291 | 81\% | 87\% | 83\% | 88\% | 83\% | 91\% | 93\% | 94\% |
| Grand Total | 1641 | 3573 | 69\% | 73\% | 70\% | 74\% | 71\% | 75\% | 81\% | 80\% |

### 8.3 Manufacturer penetration

Gold Leaf Tobacco Corporation products still showing highest incidence of price recorded below MCT level followed by Carnilinx and Afroberg Tobacco. GLTC increasing to $85 \%$ price incidence of their products found selling below MCT level. It must be noted that the brand Remington Gold manufactured by Gold Leaf Zimbabwe is the main driver of the dominance of the Gold Leaf Tobacco Corporation in availability.

Note: it must be noted that when we remove Remington gold from the GLTC roster, $51 \%$ of the GLTC portfolio still has the most mentions at R20.00 and below.

Table: Lowest price incidence by Manufacturer

|  | Outlets in Scope |  | $\begin{aligned} & \text { R20.00 and } \\ & \text { below } \end{aligned}$ |  | R21.60 and below |  | $\begin{aligned} & \text { R22.00 and } \\ & \text { below } \end{aligned}$ |  | $\begin{aligned} & \text { R25.00 and } \\ & \text { below } \end{aligned}$ |  |

### 8.4 Brand Incidence

Following the national trend from the previous study, Remington Gold manufactured by Gold Leaf Tobacco Zimbabwe leads the brand listing of cheapest available products, accounting for $21 \%$ of the lowest prices in the study. At $99 \%$ of the products found of the brand selling at R20.00 and below, it is the dominant brand available, frequently mentioned at R15.00 a pack.

### 8.5 Carton purchase incidence

All cheapest cartons available in the market were found to be retailing for R200.00 or lower in the second study. Of note is the prevalence of all local manufacturers having product mentioned at R200.00 albeit at low Outlets in Scope levels for the smaller manufacturers. Carton prices found were as low as R60 in Western Cape which translates into R6 a pack. In Gauteng R70 (R7 a pack) and Free State was R75 (R7.50 a pack).

Table: Carton price incidence by brand and price range grouping.

|  |  | Outlets in Scope |  | R200.00 and below |  | R216.09 and below |  | R220.00 and below |  | R250.00 and below |  |

[^2]9. Key Results - Individual Hot Spot Analysis

### 9.1. Free State

- $81 \%$ of outlets visited, sold a cigarette pack below MCT price level.
- Non Organized Informal has a 95\% incidence of prices below MCT found.
- The number of modern trade stores selling a brand at less at R20.00 and below has increased in the second wave compared to the first wave to $18 \%$ from a $6 \%$.
- Increase in below MCT price incidence largely driven by GLTC products and this is mostly within pack format.

### 9.2 Gauteng

- $70 \%$ of outlets sold a cigarette pack at R20.00 or less in the universe visited.
- Within the channel's the Non Organized Informal and Wholesale, typically situated within informal market, had high readings of low pricing with significant increases between the waves.
- Conversely to the Wholesale and Non Organized Informal, Modern Trade showed a decline in at or below R20.00 pricing.
- Incidence of GLTC products, in terms of packs, selling below MCT level has increased however we do note a drop in incidence rates for Carnilinx which is still at a very high incidence level of 90\%
- Savannah still shows high incidence into latest wave. Caesar, Chelsea, RG have increased incidence into current wave , these brands could be overall embarking on a price decrease strategy.
- Legends a new brand in the market, still showing high incidence of below MCT price, into latest read.
- From a carton perspective Afroberg brands (Cape, Golden, Rainbow, Red \&Black) most prominent in terms of high incidence of below MCT pricing in Gauteng. 100\% of all carton products purchased in this region were at below MCT level.

### 9.3 Western Cape

- The number of stores who confirmed selling product below R20.00 and below has decreased to $71 \%$ vs $73 \%$ from the first WAVE.
- However, continuing the theme of availability of at and below R20.00, Non Organized Informal and Wholesale continue the trend in the Western Cape of high prevalence rates.
- Modern Trade in the Western Cape are not immune to low pricing availability increase with a $2 \%$ share increase of cheap pricing below R20.00
- Afroberg and Carnillinx brands have maintained high incidence of price below MCT level.
- From a carton sales perspective, a strong concentration of below MCT pricing incidence with $97 \%$ incidence of below MCT pricing found. The cheapest carton price picked up was R60.00

Table: Western Cape incidence by channel type:
